

**Statement of Lauren Saunders on Elizabeth Warren's appointment as Assistant to the President and Special Advisor to the Treasury Secretary**

FOR IMMEDIATE RELEASE: SEPTEMBER 16, 2010

We at the National Consumer Law Center have worked with Elizabeth Warren for years and are excited that she will be instrumental in setting the course for the Consumer Financial Protection Bureau. Elizabeth has a deep understanding of the needs of consumers and the ways in which the financial system has let them down. Elizabeth is the right person at the right time to implement her original vision for an effective agency that will put consumers first and prevent the recent failures that have wrecked havoc with American families and our economy.
